SILVER OAK UNIVERSITY

TUTORIAL - 6 Manual Test Execution

Aim: Apply manual test cases using multiple input conditions and prepare detailed test execution and summary reports.

Application Under Test: Instagram Web (https://www.instagram.com)

Module Name: Login Page – Functional & UI Test Cases

Test Case ID: st_01

Webpage URL: https://www.instagram.com

Date: 10 August 2026

Tester Name: Saloni Ashish Tanna

Description / Problem Statement:

Perform manual testing of Instagram's web login page and related core features (login with valid/invalid credentials, search, follow, post interaction and logout). Execute 9 carefully selected test cases covering positive, negative and UI scenarios. Capture screenshots as evidence and prepare a detailed test execution report along with a summary of results.

Scenario ID: 2a

Scenario: Login with valid credentials

Test Steps:

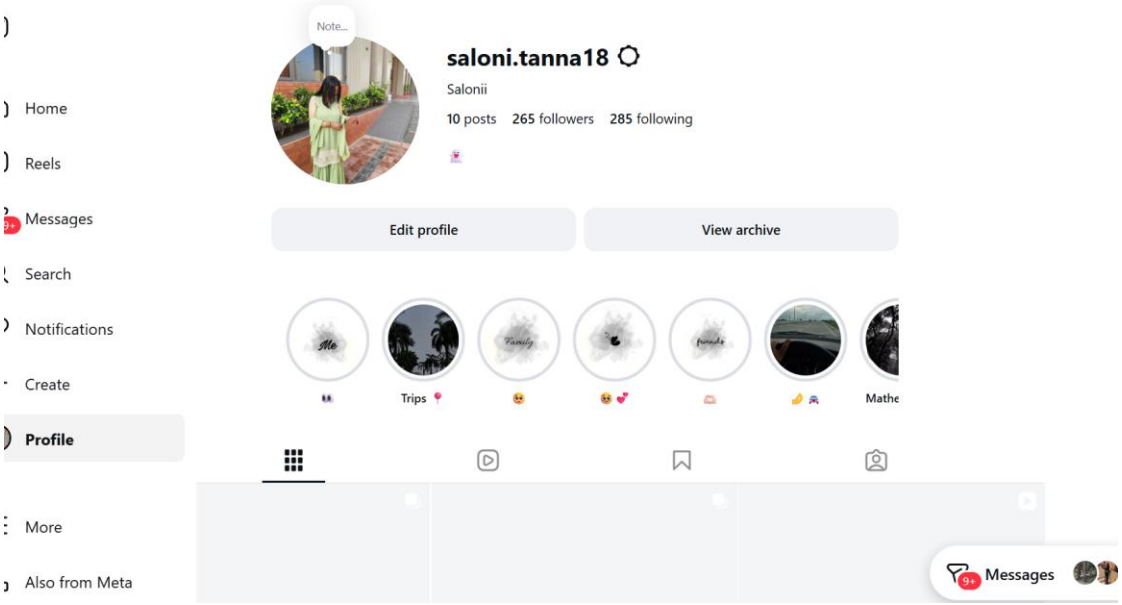

1. Open https://www.instagram.com in a browser
2. Enter valid Username (saloni.tanna18)
3. Enter correct Password
4. Click the Log in button

Expected Result: User is successfully logged in and redirected to the Home / Profile page showing posts, followers and following count.

Actual Result: Login was successful. Profile page of saloni.tanna18 loaded correctly with 10 posts, 265 followers and 285 following.

Status: **Pass**

Screenshots:

Scenario ID: 2b

Scenario: Login with wrong password

Test Steps:

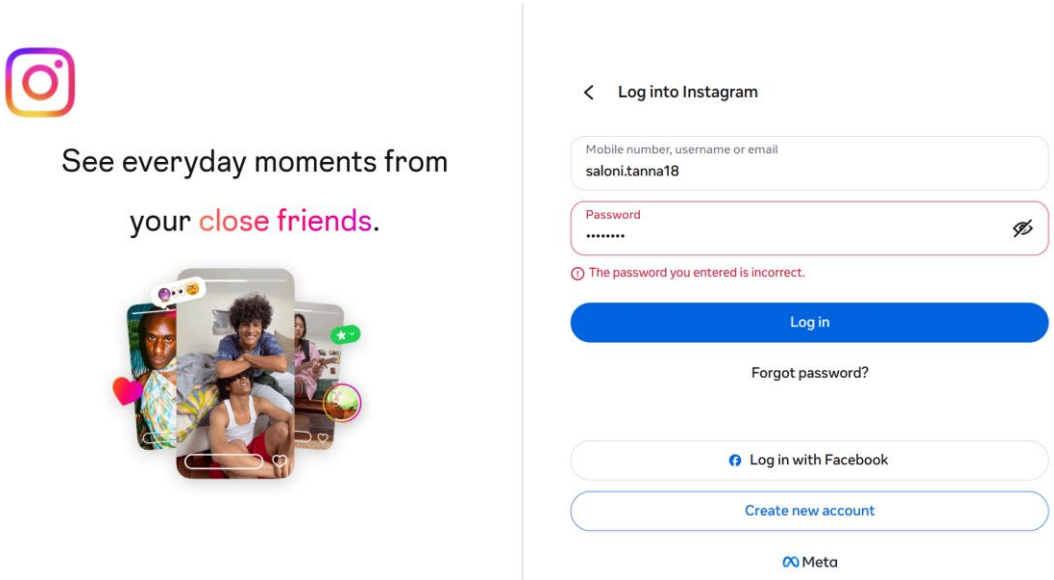

1. Open Instagram login page
2. Enter valid username (saloni.tanna18)
3. Enter an incorrect password
4. Click Log in

Expected Result: An error message “The password you entered is incorrect.” should be displayed and user should remain on the login page.

Actual Result: Red error message “The password you entered is incorrect.” appeared below the password field. Login was blocked.

Status: Pass

Screenshots:

Scenario ID: 2c

Scenario: Try login with empty fields

Test Steps:

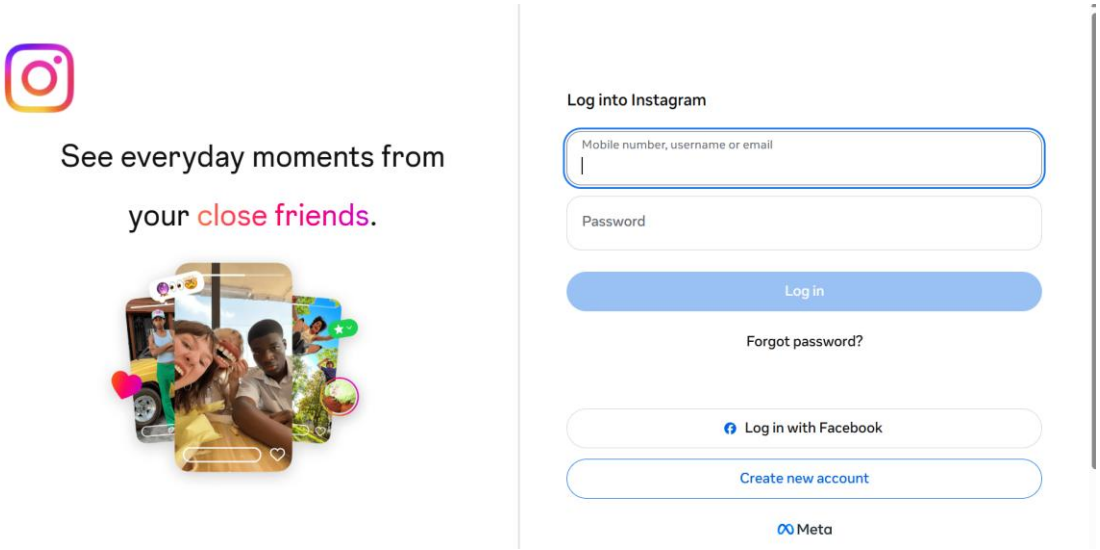

1. Open Instagram login page
2. Leave Mobile number / username / email and Password fields blank
3. Observe the state of the Log in button

Expected Result: Log in button should remain disabled or no request should be sent when mandatory fields are empty.

Actual Result: Log in button stays inactive when fields are empty. No error popup is needed because submission is prevented.

Status: **Pass**

Screenshots:

Scenario ID: 2e

Scenario: Forgot password link visibility

Test Steps:

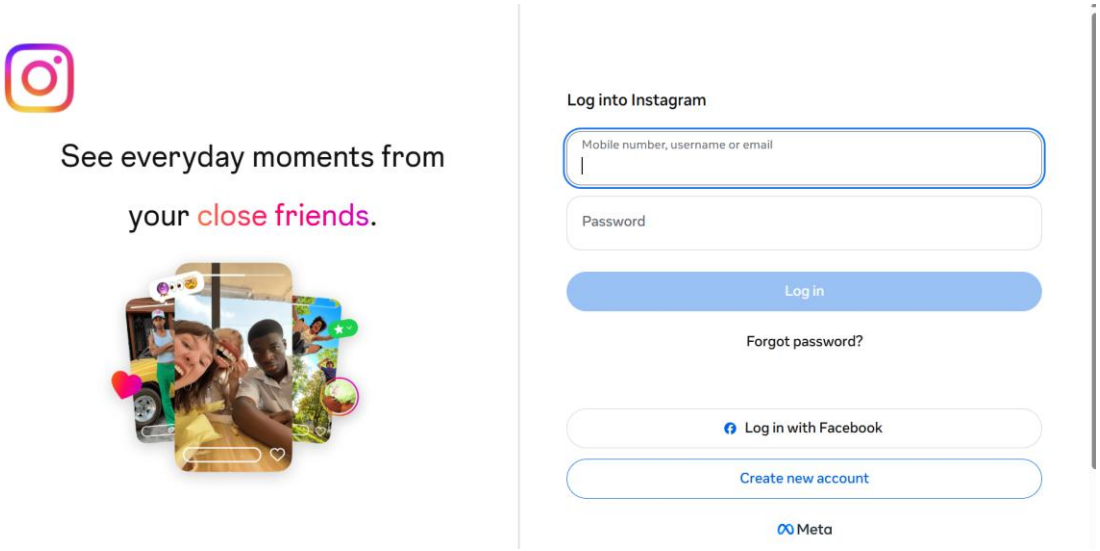

1. Open Instagram login page
2. Locate and click the “Forgot password?” link
3. Observe navigation

Expected Result: User should be taken to the password recovery screen asking for email or username.

Actual Result: “Forgot password?” link is clearly visible under the Log in button and is clickable.

Status: **Pass**

Screenshots:

Scenario ID: 3a

Scenario: Search for a user and open profile

Test Steps:

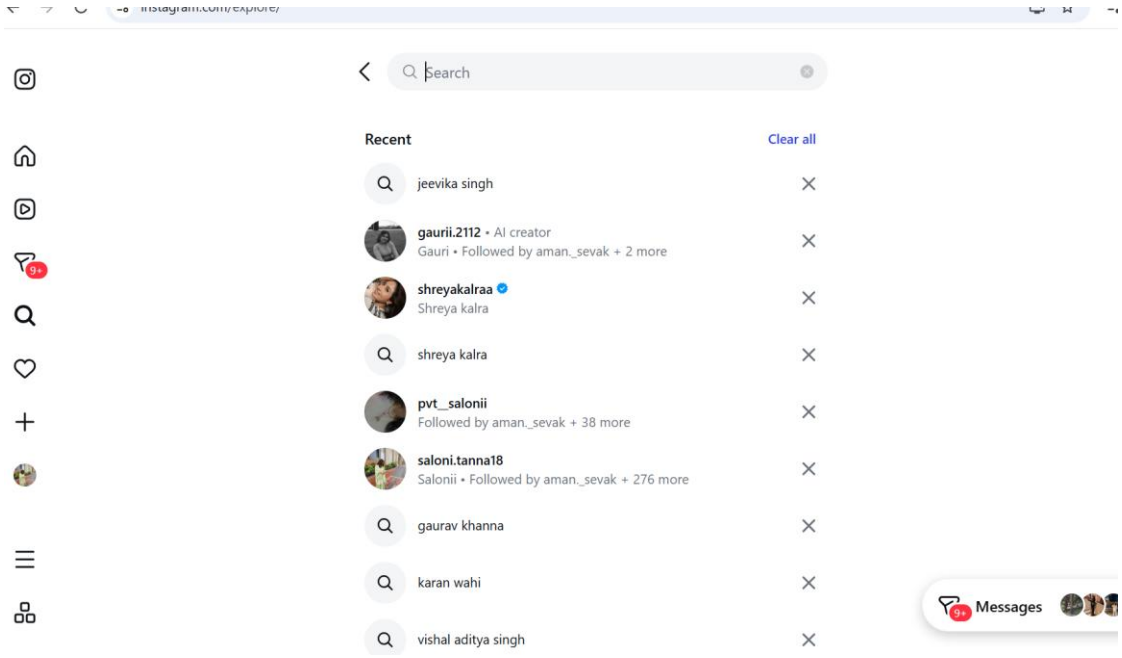

1. Login with valid credentials
2. Click the Search icon in the left navigation
3. Type a username (e.g. shreyakalraa or shreya kalra)
4. Click on the matching profile from the results

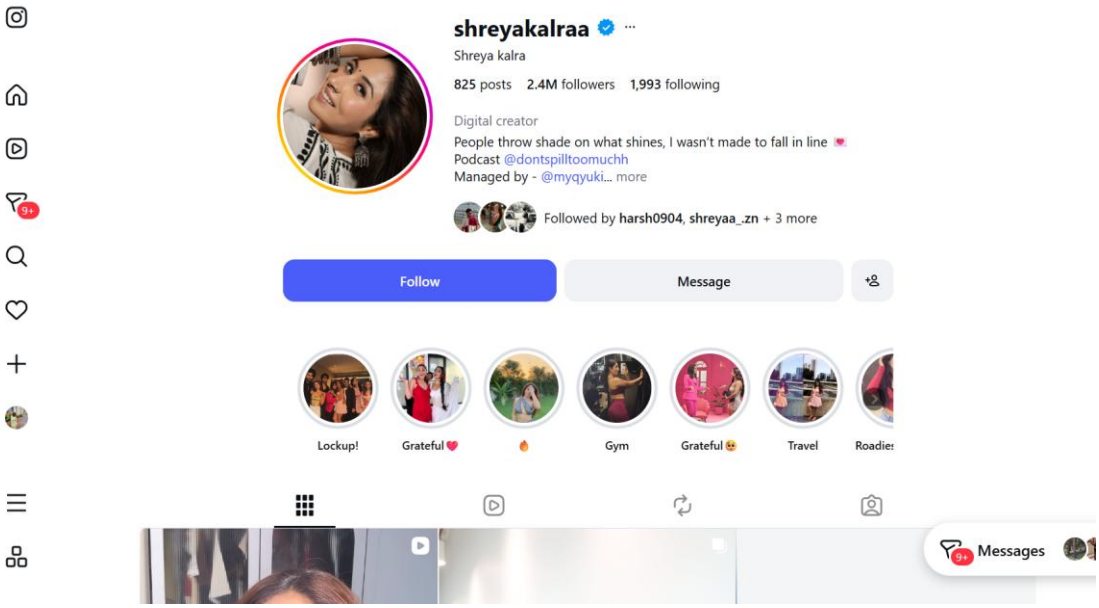

Expected Result: Matching profiles appear in the search results and the selected profile opens correctly.

Actual Result: Search results listed recent and matching accounts. Profile of verified user shreyakalraa opened successfully showing 2.4M followers.

Status: Pass

Screenshots:

Scenario ID: 3b

Scenario: Follow a public account

Test Steps:

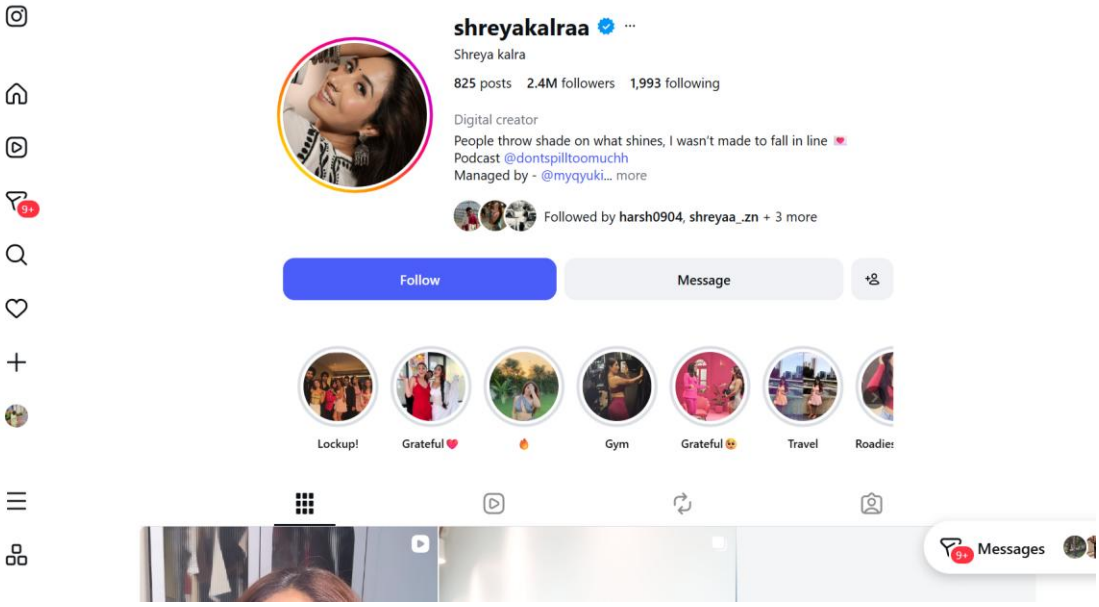

1. Open a public profile (shreyakalraa)
2. Click the blue “Follow” button
3. Observe the button state change

Expected Result: Button text should change from “Follow” to “Following”.

Actual Result: After clicking Follow, the button changed to “Following” with a dropdown arrow. Follow action succeeded.

Status: **Pass**

Screenshots:

Scenario ID: 3c

Scenario: View a post and interact (Like)

Test Steps:

1. From the profile feed, open any post
2. Click the heart (Like) icon under the post
3. Observe the visual feedback and like count

Expected Result: Heart icon should turn red/filled and the like should be registered.

Actual Result: Post opened correctly. Clicking the heart registered the like (heart turned filled). Comment and share icons also visible.

Status: Pass

Screenshots:

Scenario ID: 3d

Scenario: Logout from the application

Test Steps:

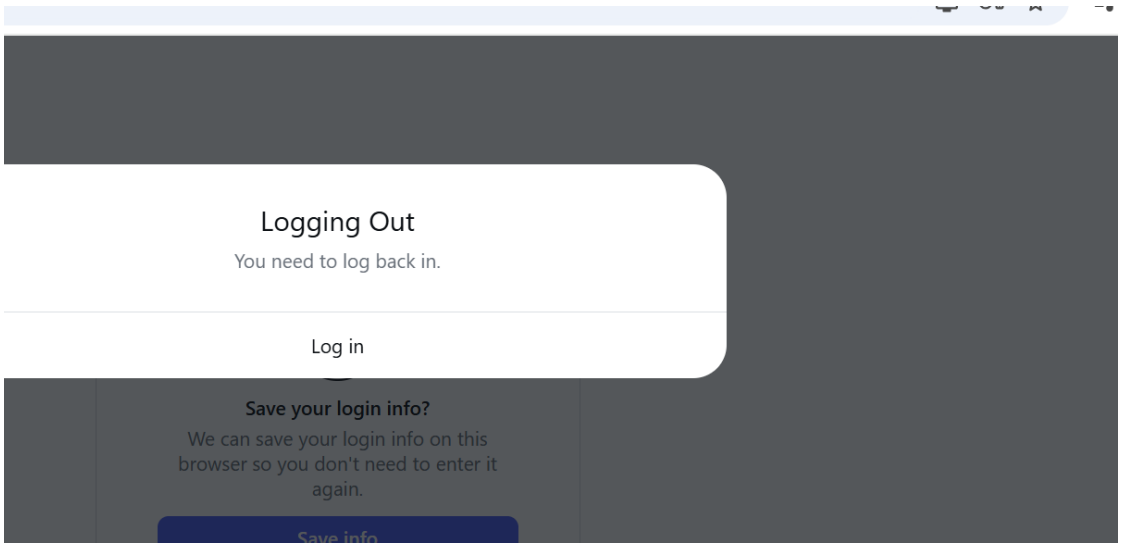

1. While logged in, open the profile / more menu
2. Select Log out option
3. Confirm if a confirmation dialog appears

Expected Result: User should be logged out and a message “Logging Out – You need to log back in.” (or similar) should appear.

Actual Result: Logout confirmation dialog appeared: “Logging Out – You need to log back in.” Session was terminated successfully.

Status: **Pass**

Screenshots:

Scenario ID: 4a

Scenario: UI Layout & Button Alignment on Login Page

Test Steps:

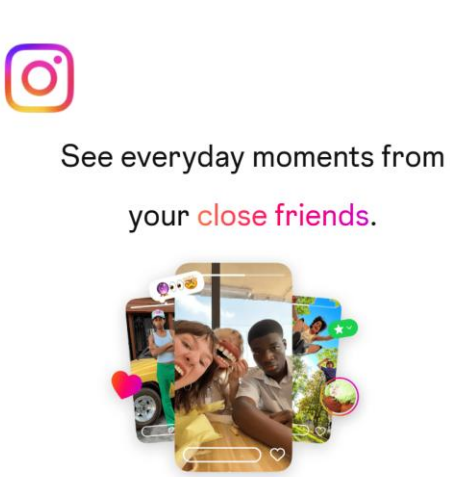

1. Open the Instagram login page (https://www.instagram.com)
2. Observe placement of Instagram logo, input fields, Log in button, Forgot password link, Log in with Facebook and Create new account buttons

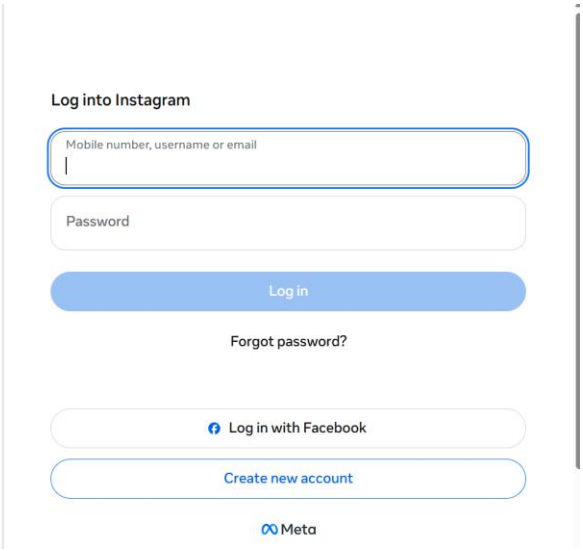

Expected Result: All UI elements should be properly aligned, spaced and have good contrast.

Actual Result: Login page layout is clean and professional. Fields and buttons are well aligned with sufficient spacing and readable text.

Status: **Pass**

Summary of Test Results

Total Test Cases	9
Passed	9
Failed	0
Pass Percentage	100%
Overall Result	**PASS**

Conclusion and Recommendations

All 9 executed test cases passed successfully. The Instagram web application correctly handles:

- Valid and invalid login credentials with proper error messaging
- Empty field validation (button remains disabled)
- Search functionality and profile navigation
- Follow / Following state change
- Post like interaction
- Clean logout with confirmation dialog
- Consistent and professional UI layout on the login page

No critical functional defects were observed in the tested scenarios. The application under test is stable for the covered flows.

Recommendations

1. Continue regression testing after any future UI or authentication changes.
2. Add automated checks for rate-limiting / CAPTCHA after multiple failed logins (security best practice).
3. Extend test coverage to mobile responsive views and dark mode if required by the curriculum.
