SILVER OAK UNIVERSITY | TUTORIAL-10 | Automation & Regression Analysis

Module Name: Instagram Mobile Application – Functional, UI & System Test Cases

Test Case ID: ST_10 | Tester: Student | Application: Instagram (Mobile) | URL/App: Instagram App / www.instagram.com

Test Case Description:	To validate Login, Navigation, Profile, Search, Messaging, Settings and overall UI/UX of Instagram mobile application using Black-box, Integration and System testing techniques.
Tester Name:	Saloni Ashish Tanna
Prerequisites:	1. Stable internet connection 2. Instagram mobile app installed (Android/iOS) 3. Valid test credentials 4. Device with sufficient storage & battery
Environment Information:	OS: Android / iOS | Device: Mobile Phone | App Version: Latest | Network: Wi-Fi / Mobile Data

Scenario ID	Scenario	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
1a	Login with valid credentials	1. Open Instagram app 2. Enter valid Username / Email / Mobile 3. Enter valid Password 4. Tap Log in	Valid username + correct password	User successfully logs in and lands on Home Feed	Login successful – Home Feed displayed	Pass	Main positive login flow verified
1b	Login with wrong password	1. Open Instagram app 2. Enter valid Username 3. Enter wrong Password 4. Tap Log in	Valid username + incorrect password	Error message shown (e.g. 'Incorrect password')	Error message displayed correctly	Pass	Password validation working
1c	Login with empty fields	1. Open Instagram app 2. Leave Username and/or Password blank 3. Tap Log in	Blank input fields	Login button remains disabled or shows validation error	Login button not enabled until both fields filled	Pass	Empty field validation correct
1d	Login with case-changed username/password	1. Open Instagram app 2. Enter username with altered casing 3. Enter password with altered casing 4. Tap Log in	Username case change / Password case change	Username may be case-insensitive; Password is case-sensitive → error if password case wrong	Behaved as expected (password case-sensitive)	Pass	Case sensitivity verified
1e	Forgot password flow	1. On Login screen tap 'Forgotten password?' 2. Enter registered email / username / mobile 3. Follow reset steps	Registered email / username	Password reset process starts (OTP / email link)	Reset process initiated successfully	Pass	Forgot password flow working
1f	Login screen UI & language selector	1. Open Instagram app (logged out) 2. Observe Login UI 3. Check language dropdown (English India)	None	Login UI clean, Instagram logo visible, language selector works	UI clean, language selector present and functional	Pass	Login page UI verified (screenshot attached)
2a	Home Feed loads after login	1. Login successfully 2. Observe Home Feed	Logged-in session	Home Feed shows posts from followed accounts with like, comment, share options	Home Feed loaded correctly with posts (e.g. silveroakuni post visible)	Pass	System testing – Feed integration working
2b	Interact with post (Like / Comment)	1. On Home Feed 2. Tap heart icon on a post 3. Tap comment icon and type a comment	Any visible post	Like count increases / comment is posted	Like and comment actions work as expected	Pass	Integration of like & comment modules
3a	Search / Explore page loads	1. Tap Search (magnifying glass) icon 2. Observe Explore grid	None	Explore page shows grid of recommended posts / Reels with view counts	Explore grid displayed with multiple posts and view counts	Pass	Search & Explore module verified (screenshot)
3b	Search using Meta AI / keyword	1. On Search page 2. Tap search bar 'Search with Meta AI' 3. Enter a keyword (e.g. cafe, food)	Keyword: KOMO / cafe	Relevant results or suggestions appear	Search suggestions and results shown	Pass	Search functionality working
4a	View public business profile	1. Search for a business account (e.g. komobykaffa) 2. Open the profile	Username: komobykaffa	Profile shows posts count, followers, following, bio, contact options, highlights	Profile loaded correctly – 205 posts, 31.9K followers, bio & contact visible	Pass	Profile page system test (screenshot)
4b	Follow / Unfollow a profile	1. Open a public profile 2. Tap Follow button 3. Tap Following → Unfollow	Any public account	Follow button changes to Following and vice-versa	Follow / Unfollow works correctly	Pass	Follow integration tested
4c	View highlights / categories on profile	1. Open business profile 2. Observe category circles (Breakfast, Food, People, Vibes)	Business profile with highlights	Highlights are tappable and show related stories/posts	Category highlights visible and functional	Pass	Highlights UI verified
5a	Open Direct Messages (DM) list	1. From Home or Profile 2. Tap Messenger / paper-plane icon or Messages	Logged-in user	List of conversations appears with unread indicators	DM list displayed with multiple chats and unread counts	Pass	Messaging module integration (screenshot)
5b	Open a conversation thread	1. In DM list tap any conversation 2. Observe message thread	Existing chat	Previous messages load correctly	Conversation opens and messages visible	Pass	DM thread works
6a	Open Settings and activity	1. Go to Profile → Menu (☰) → Settings and activity	Logged-in user	Settings page shows Accounts Center, Saved, Archive, Notifications, Privacy etc.	Settings page loaded with all expected sections	Pass	Settings navigation verified (screenshot)
6b	Check Account privacy status	1. In Settings → Who can see your content → Account privacy	None	Privacy status (Public / Private) is shown correctly	Account privacy shown as Private	Pass	Privacy setting readable
7a	Check overall UI consistency (Dark mode)	1. Navigate through Login, Home, Search, Profile, Settings 2. Observe colors, icons, spacing	Dark theme	Consistent dark theme, good contrast, proper spacing	UI consistent across screens with good contrast	Pass	UI/UX system testing
7b	Bottom navigation bar functionality	1. Tap each bottom nav icon: Home, Reels, Create, Search, Profile	None	Each icon navigates to correct screen	All bottom navigation icons work correctly	Pass	Navigation integration tested
7c	Post detail view (single post)	1. Open any post from feed or profile 2. Observe full post view with caption, likes, comments	Any post	Full post view with media, caption, engagement metrics	Post detail view correct (e.g. pizza post by komobykaffa)	Pass	Post detail UI verified (screenshot)
8a	Session persistence after app restart	1. Login successfully 2. Close Instagram completely 3. Reopen app	Logged-in session	User remains logged in (or asks for biometric / password if configured)	Session retained after restart	Pass	Session management system test
8b	Logout functionality	1. Go to Settings → Accounts Center or Profile menu 2. Tap Log out	Logged-in session	User is logged out and redirected to Login screen	Logout successful – Login screen appears	Pass	Logout flow verified

SUMMARY OF TEST RESULTS

Total Test Cas	**22**
Passed	**22**
Failed	**0**
Pass %	**100%**

CONCLUSION & RECOMMENDATIONS

All 22 test cases related to Login, Home Feed, Search/Explore, Profile, Messaging, Settings and UI/Navigation passed successfully. Instagram mobile application demonstrated stable behaviour under black-box functional testing, integration testing between modules (Feed ↔ Like ↔ Comment, Search ↔ Profile, Settings ↔ Privacy) and overall system testing. No critical defects found in the tested flows. Application is ready for further regression cycles.
