Module Name: Python Automation Testing - Navigation, Forms, Links & Multi-Page Workflow (Regression Scenario)
Test Case ID: st_11_selenium
Tester Name: Saloni Ashish Tanna
Webpage URL: https://www.saucedemo.com/
Tools Used: Python, Selenium WebDriver, PyCharm, Google Chrome

- ## Scenario ID: 11.1

Scenario: Launch Chrome and open the SauceDemo website
Steps Performed:

1. Launch Google Chrome using Selenium WebDriver
2. Maximize the browser window
3. Open https://www.saucedemo.com/

Result: Website opened successfully. Login page is displayed.
Test Status: **Pass**
Screenshots:

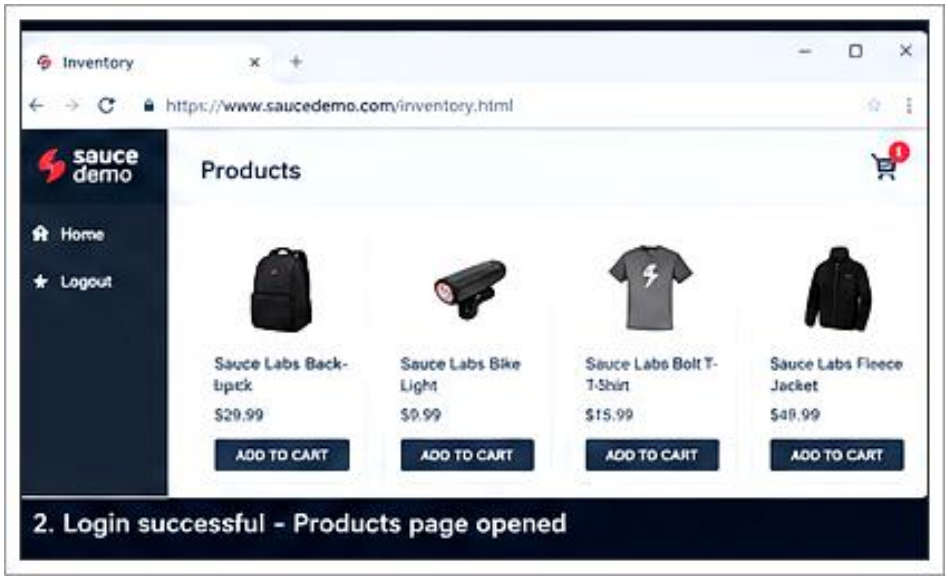

- ## Scenario ID: 11.2

Scenario: Login using valid username and password
Steps Performed:

1. Enter Username: standard_user
2. Enter Password: secret_sauce
3. Click on Login
4. Validate that the URL contains "inventory"

Result: User logged in and Products page (inventory) opened.
Test Status: **Pass**

Screenshots:

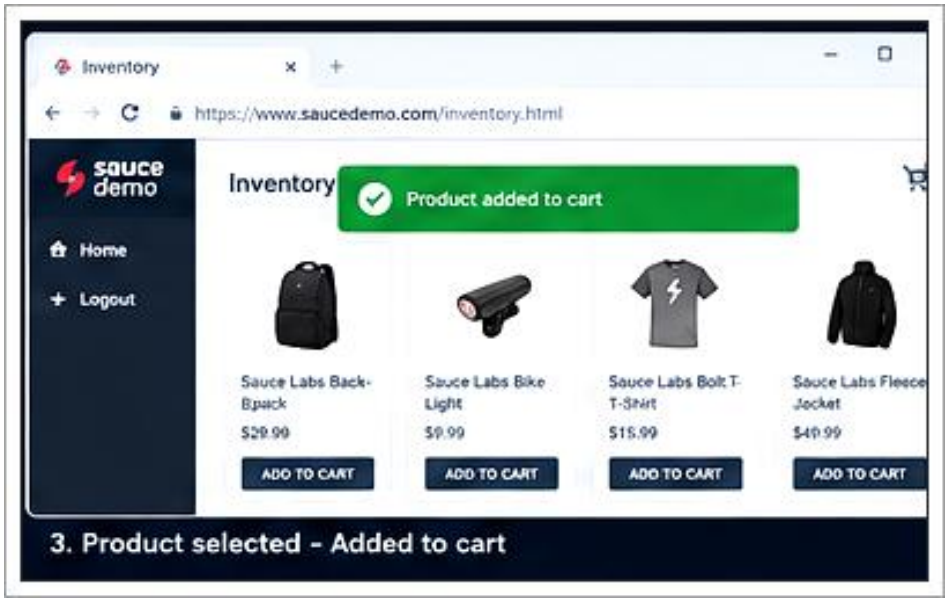

- ## Scenario ID: 11.3

Scenario: Product selection - add Sauce Labs Backpack to cart
Steps Performed:

1. Wait until "Add to cart" button of Sauce Labs Backpack is clickable
2. Click on Add to cart

Result: Product added to the cart; cart badge updated.
Test Status: Pass
Screenshots:

- ## Scenario ID: 11.4

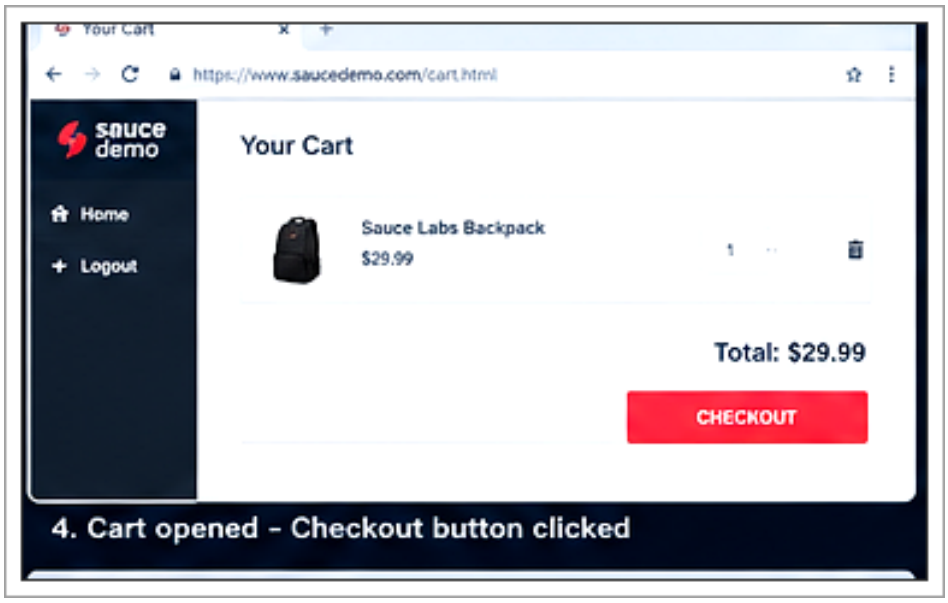

Scenario: Navigate to the shopping cart
Steps Performed:

1. Click on the shopping cart icon
2. Validate that the URL contains "cart"

Result: Cart page opened and selected product is listed.

Test Status: Pass

Screenshots:

- ## Scenario ID: 11.5

Scenario: Fill the checkout information form

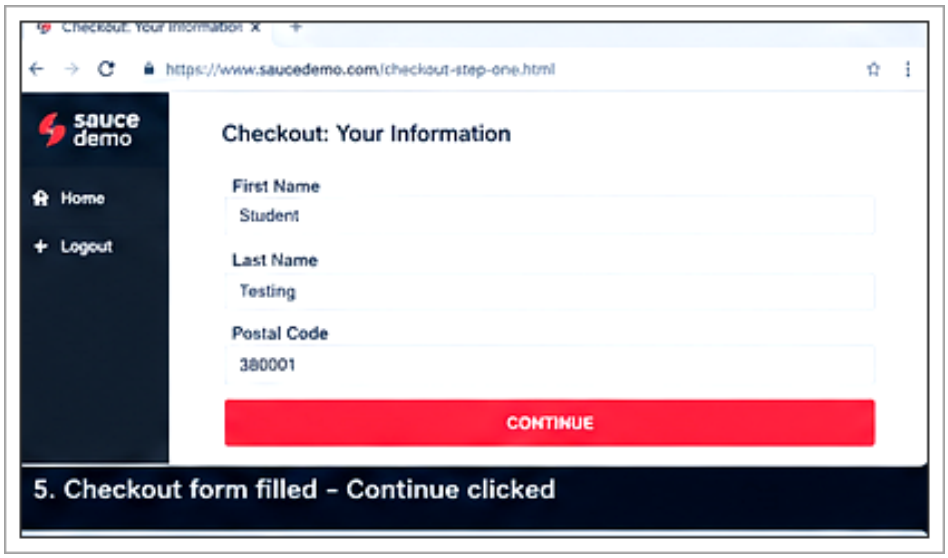

Steps Performed:

1. Click on Checkout
2. Enter First Name: Student
3. Enter Last Name: Testing
4. Enter Postal Code: 380001
5. Click on Continue

Result: Checkout data accepted without any error.

Test Status: Pass

Screenshots:

- ## Scenario ID: 11.6

Scenario: Validate multi-page workflow (checkout step two)

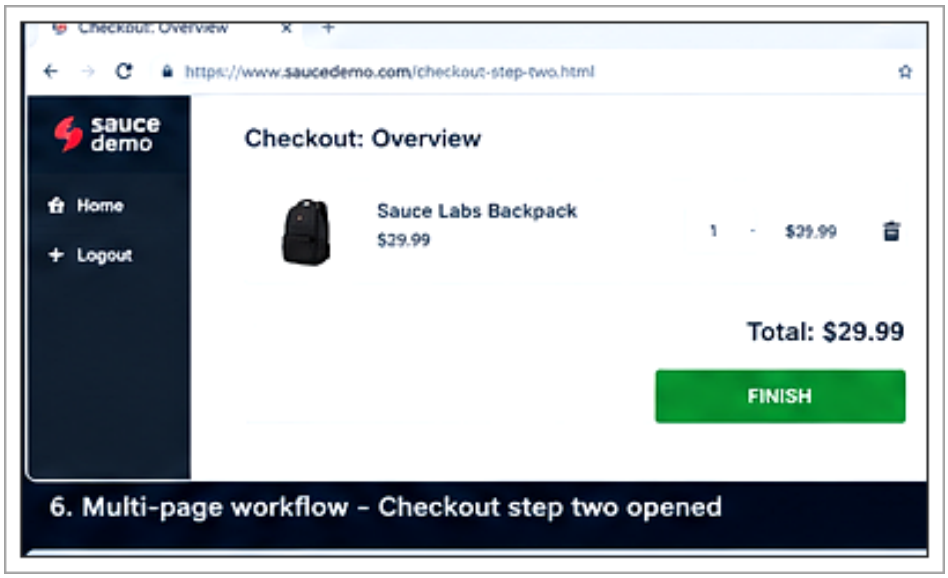

Steps Performed:

1. Complete the checkout information step
2. Wait until URL contains "checkout-step-two"
3. Validate the Checkout: Overview page

Result: Correct page (checkout-step-two) opened.

Test Status: Pass

Screenshots:

- ## Scenario ID: 11.7

Scenario: Browser back and forward navigation test

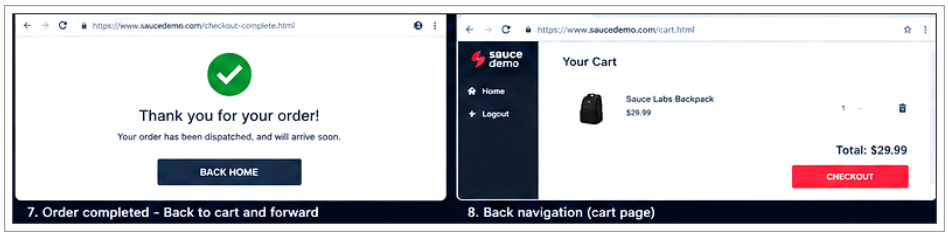

Steps Performed:

1. Perform driver.back()
2. Perform driver.forward()
3. Verify the application navigates correctly

Result: Back and forward navigation worked correctly.

Test Status: Pass

Screenshots:

- ## Source Code (tutorial11.py)

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.support.ui import WebDriverWait
from selenium.webdriver.support import expected_conditions as EC
```

```
driver = webdriver.Chrome()
driver.maximize_window()
wait = WebDriverWait(driver, 10)

try:
    # 1. Open Website
    driver.get("https://www.saucedemo.com/")
    print("Website opened successfully")

    # 2. Login
    wait.until(
        EC.visibility_of_element_located((By.ID, "user-name"))
    ).send_keys("standard_user")
    driver.find_element(By.ID, "password").send_keys("secret_sauce")
    driver.find_element(By.ID, "login-button").click()

    # 3. Validate Products Page
    wait.until(EC.url_contains("inventory"))
    assert "inventory" in driver.current_url
    print("Login Test: PASS")

    # 4. Product Selection
    wait.until(
        EC.element_to_be_clickable((By.ID, "add-to-cart-sauce-labs-backpack"))
    ).click()
    print("Product Selection: PASS")

    # 5. Open Cart
    driver.find_element(By.CLASS_NAME, "shopping_cart_link").click()
    assert "cart" in driver.current_url
    print("Cart Navigation: PASS")

    # 6. Checkout
    driver.find_element(By.ID, "checkout").click()

    # 7. Checkout Form
    wait.until(
        EC.visibility_of_element_located((By.ID, "first-name"))
    ).send_keys("Student")
    driver.find_element(By.ID, "last-name").send_keys("Testing")
    driver.find_element(By.ID, "postal-code").send_keys("380001")
    driver.find_element(By.ID, "continue").click()

    # 8. Validate Multi-page Workflow
    wait.until(EC.url_contains("checkout-step-two"))
    assert "checkout-step-two" in driver.current_url
    print("Multi-Page Workflow: PASS")

    # 9. Back and Forward
    driver.back()
    driver.forward()
    print("Back/Forward Navigation: PASS")

finally:
    driver.quit()
    print("Tutorial 11 Completed Successfully")
```

- **Console Output (PyCharm)**

```
Website opened successfully
Login Test: PASS
```

```
Product Selection: PASS
Cart Navigation: PASS
Multi-Page Workflow: PASS
Back/Forward Navigation: PASS
Tutorial 11 Completed Successfully
```

- **Summary Of Test Results:**

Total Test Cases- 7

Passed- 7

Failed- 0

Pass %- 100%

Conclusion and Recommendations:

Pass Rate: 100% - All scenarios executed successfully

Using Python and Selenium WebDriver, the script automated website navigation, login form handling, product selection, cart navigation, checkout form handling and the multi-page workflow of the SauceDemo application. All assertions passed and the browser back/forward navigation worked as expected.

Issues Found

All automated scenarios behaved as expected; no defects were observed.

Recommendations

1. **Include Negative Testing**
   Add scenarios such as wrong password, locked_out_user and blank checkout fields to verify error messages.
2. **Adopt Page Object Model**
   Keep locators and page actions in separate classes so the script is easier to update.
3. **Reuse as Regression Suite**
   Run the same script after every new build to confirm existing features still work.

- **Bug Reports:**

Not applicable - no bug was raised because every test case passed.
