Module Name:	Amazon Shopping Flow - Login (OTP), Search, Product, Cart & Checkout Test Cases
Test Case ID:	st_01
Tester Name:	Saloni Ashish Tanna
Test Case Description:	To validate the functionality of the sign-in/OTP verification flow, homepage, product search, product details, cart, and checkout workflows on the Amazon shopping website, along with UI/UX and data consistency checks.
Prerequisites:	1. Stable internet connection 2. Chrome browser 3. Valid Amazon account / registered mobile number 4. Delivery address set to Ahmedabad, Gujarat, India
Environment Information:	OS: Windows Browser: Google Chrome Webpage URL: https://www.amazon.com

Scenario ID	Scenario	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
1a	Sign in with registered mobile number / email	1. Go to amazon.com 2. Click on Account & Lists / Sign in 3. Enter registered mobile number or email 4. Click Continue	Registered mobile number	User proceeds to the next authentication step (password entry or verification)	System accepted the mobile number and proceeded to a password reset requirement screen	Pass	Sign-in entry field and Continue button work as expected
1b	Password reset required - choose OTP delivery method	1. Continue from the sign-in step 2. System detects a password reset is required 3. Select OTP delivery option (email or mobile) 4. Click Send OTP	Masked email (s*******9@gmail.com) and masked mobile (+917*****3182)	User can choose either the registered email or mobile number to receive the OTP, and OTP is sent on clicking Send OTP	Both options were shown correctly with masked values; mobile option was selectable and Send OTP button was enabled	Pass	Masking of email/phone works correctly for privacy
1c	Enter OTP for verification	1. Receive OTP on selected mobile number 2. Enter the 6-digit OTP in the security code field 3. Click Continue	Valid 6-digit OTP (356240)	OTP is verified successfully and user is logged in / allowed to reset password	OTP was accepted and user was redirected to the Amazon homepage	Pass	Resend code and I need more help links present and functional
1d	Successful login - Homepage loads with logged-in state	1. Complete OTP verification 2. Observe homepage header and content	-	User should land on the homepage with account name visible in the header and cart count reset	Homepage loaded correctly, header displayed "Hello, Saloni", cart showed 0 items, delivery location showed India	Pass	Session/login state correctly reflected across the page
1e	Sign in with an unregistered / invalid mobile number	1. Go to amazon.com sign-in page 2. Enter a mobile number that is not registered 3. Click Continue	Invalid / unregistered mobile number	System should show an error such as "We cannot find an account with that mobile number"	Not verified in this session - no screenshot captured for this negative flow	Not Executed	Recommended to be executed in a future test cycle
2a	Search for a product using a keyword	1. Click on the search bar 2. Type keyword "cake" 3. Click the search icon / press Enter	cake	Relevant search results for "cake" should be displayed with filters (Brands, Customer Reviews, etc.)	1-48 of over 100,000 results for "cake" displayed with product images, ratings, prices; delivery location shown as Ahmedabad 380054	Pass	Search returned relevant results with working filter panel
2b	Search with special characters / gibberish keyword	1. Click on the search bar 2. Enter a random/invalid string (e.g. "@@@###") 3. Press Enter	Special character string	System should show a "No results found" message or suggest related searches, without breaking the layout	Not verified in this session - no screenshot captured for this negative flow	Not Executed	Recommended to be executed in a future test cycle
3a	View product details page	1. Click on a product from the search results 2. Observe the product details page	100 Pack Cookie Bags with Seal (bakery packaging product)	Product page should show title, price, brand, ratings, and delivery availability for the selected location	Page displayed price INR570.12, brand and ratings (4.7, 21 reviews) correctly; however a red warning read "This item cannot be shipped to your selected delivery location. Please choose a different delivery location." even though	Fail	Shipping-eligibility message appears incorrectly for a valid, serviceable address - logged as BUG-3a
3b	Add product to cart	1. On the product page, click Add to Cart 2. Navigate to Shopping Cart	Quantity: 1	Item should be added to the cart with correct name, price and quantity reflected in the cart page	Item "100 Pack Cookie Bags with Seal..." was added successfully; cart showed Subtotal (1 item): INR 570.12, matching the product page price	Pass	Item added despite the shipping-restriction warning seen in 3a - inconsistent behaviour
4a	Proceed to checkout - enter delivery address & customs ID	1. From the cart page, click Proceed to Checkout 2. Verify the delivery address shown 3. Observe the "Add ID for customs clearance" section and order summary	Delivery address: Saloni Tanna, Ahmedabad, Gujarat 380054, India	Checkout page should display the correct delivery address, request a customs ID as required for India, and show a correct payment total in the appropriate currency	Delivery address displayed correctly; customs ID section appeared with option to add a new ID; however Order Total showed INR 570.12 while Payment Total showed USD 0.00, which is inconsistent	Fail	Payment Total displaying USD 0.00 instead of the converted charge amount is misleading - logged as BUG-4a
