TUTORIAL - 4: Functional & Non-Functional Testing

Aim: - Apply Functional, Non-Functional, Positive, and Negative Test Cases for Modules such as Login, Registration, and Payment Systems.

Description: This practical covers manual testing of amazon.com, exercising the Login/OTP verification flow, Homepage, Product Search, Product Details, Cart, and Checkout modules. Both functional and non-functional aspects (UI correctness, data consistency, shipping/payment display) were verified, and issues found are documented below.

Module Name: Amazon Shopping Flow — Login (OTP), Search, Product, Cart & Checkout Test Cases

Test Case ID: st_01

Tester Name: Saloni Ashish Tanna

Test Case Description: To validate the functionality of the sign-in/OTP verification flow, homepage, product search, product details, cart, and checkout workflows on the Amazon shopping website, along with UI/UX and data consistency checks.

Prerequisites: 1. Stable internet connection 2. Chrome browser 3. Valid Amazon account / registered mobile number 4. Delivery address set to Ahmedabad, Gujarat, India

Environment Information: OS: Windows Browser: Google Chrome Webpage URL: https://www.amazon.com

Scenario ID: 1a

Scenario: Sign in with registered mobile number / email

Test Steps:

1. Go to amazon.com
2. Click on Account & Lists / Sign in
3. Enter registered mobile number or email in the input field
4. Click Continue

Test Input: Registered mobile number

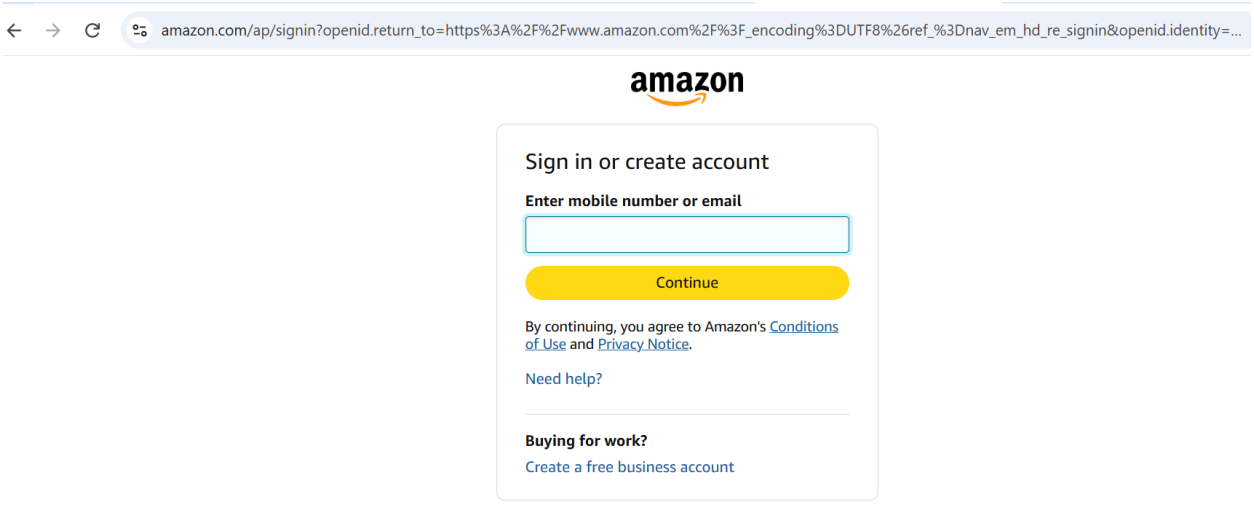

Expected Result: User proceeds to the next authentication step (password entry or verification)

Actual Result: System accepted the mobile number and proceeded to a password reset requirement screen

Status: **Pass**

Comments: *Sign-in entry field and Continue button work as expected*

Screenshots:

Scenario ID: 1b

Scenario: Password reset required — choose OTP delivery method

Test Steps:

1. Continue from the sign-in step
2. System detects a password reset is required
3. Select OTP delivery option (email or mobile)

4. Click Send OTP

Test Input: Masked email (s*******9@gmail.com) and masked mobile (+917*****3182)

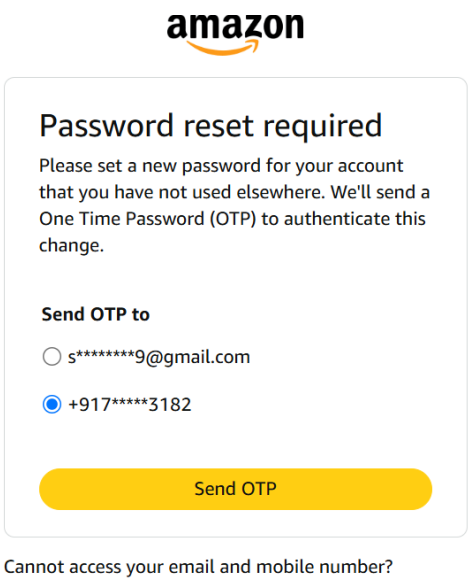

Expected Result: User can choose either the registered email or mobile number to receive the OTP, and OTP is sent on clicking Send OTP

Actual Result: Both options were shown correctly with masked values; mobile number option was selectable and Send OTP button was enabled

Status: **Pass**

Comments: *Masking of email/phone works correctly for privacy*

Screenshots:

Scenario ID: 1c

Scenario: Enter OTP for verification

Test Steps:

1. Receive OTP on selected mobile number
2. Enter the 6-digit OTP in the security code field
3. Click Continue

Test Input: Valid 6-digit OTP (356240)

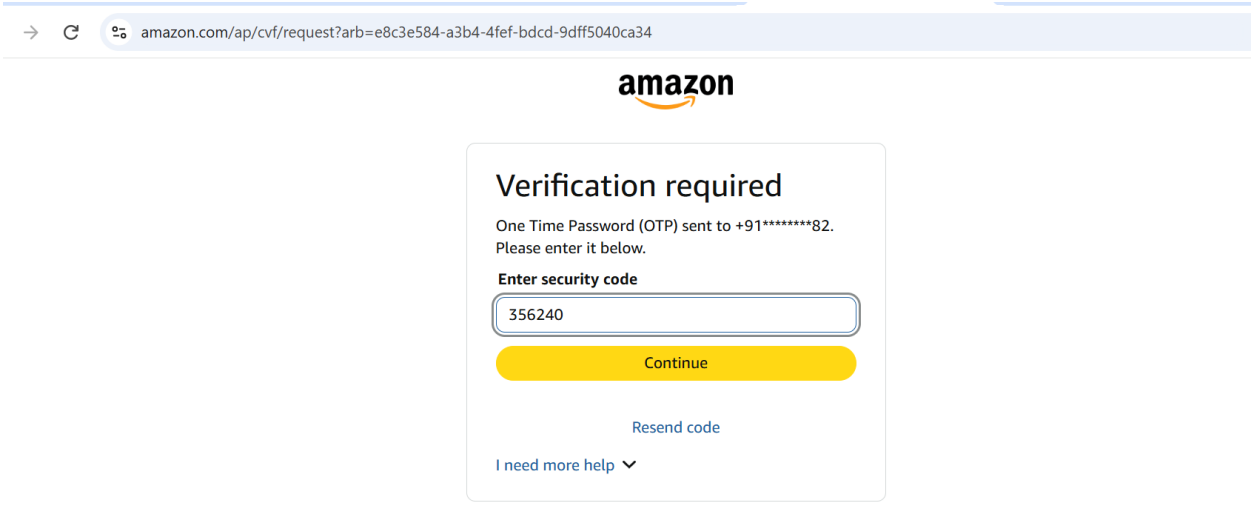

Expected Result: OTP is verified successfully and user is logged in / allowed to reset password

Actual Result: OTP was accepted and user was redirected to the Amazon homepage

Status: **Pass**

Comments: *OTP field accepted numeric input correctly; Resend code and I need more help links present*

Screenshots:

Scenario ID: 1d

Scenario: Successful login — Homepage loads with logged-in state

Test Steps:

1. Complete OTP verification
2. Observe homepage header and content

Test Input: -

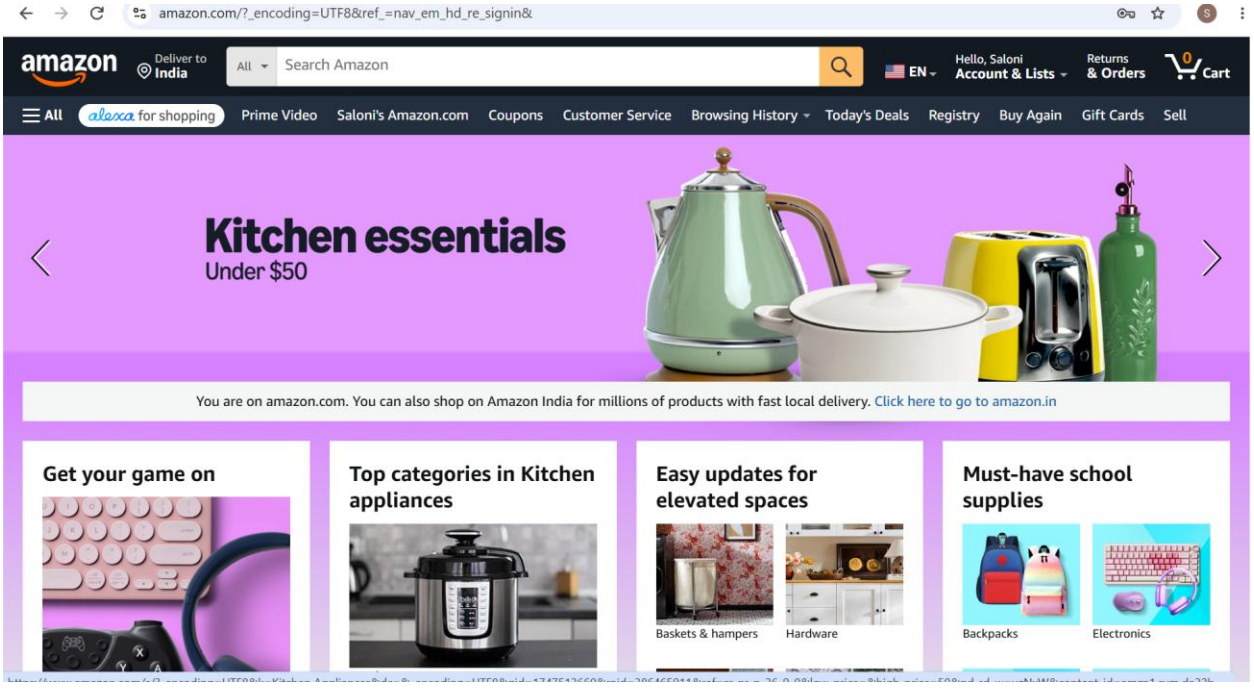

Expected Result: User should land on the homepage with account name visible in the header and cart count reset

Actual Result: Homepage loaded correctly, header displayed "Hello, Saloni" under Account & Lists, cart showed 0 items, delivery location showed India

Status: **Pass**

Comments: *Session/login state correctly reflected across the page after verification*

Screenshots:

Scenario ID: 1e

Scenario: Sign in with an unregistered / invalid mobile number

Test Steps:
1. Go to amazon.com sign-in page
2. Enter a mobile number that is not registered
3. Click Continue

Test Input: Invalid / unregistered mobile number
Expected Result: System should show an error such as "We cannot find an account with that mobile number"
Actual Result: Not verified in this session — no screenshot captured for this negative flow
Status: **Not Executed**

Comments: *Recommended to be executed in a future test cycle to confirm negative-path error handling*

Screenshots: -

Scenario ID: 2a

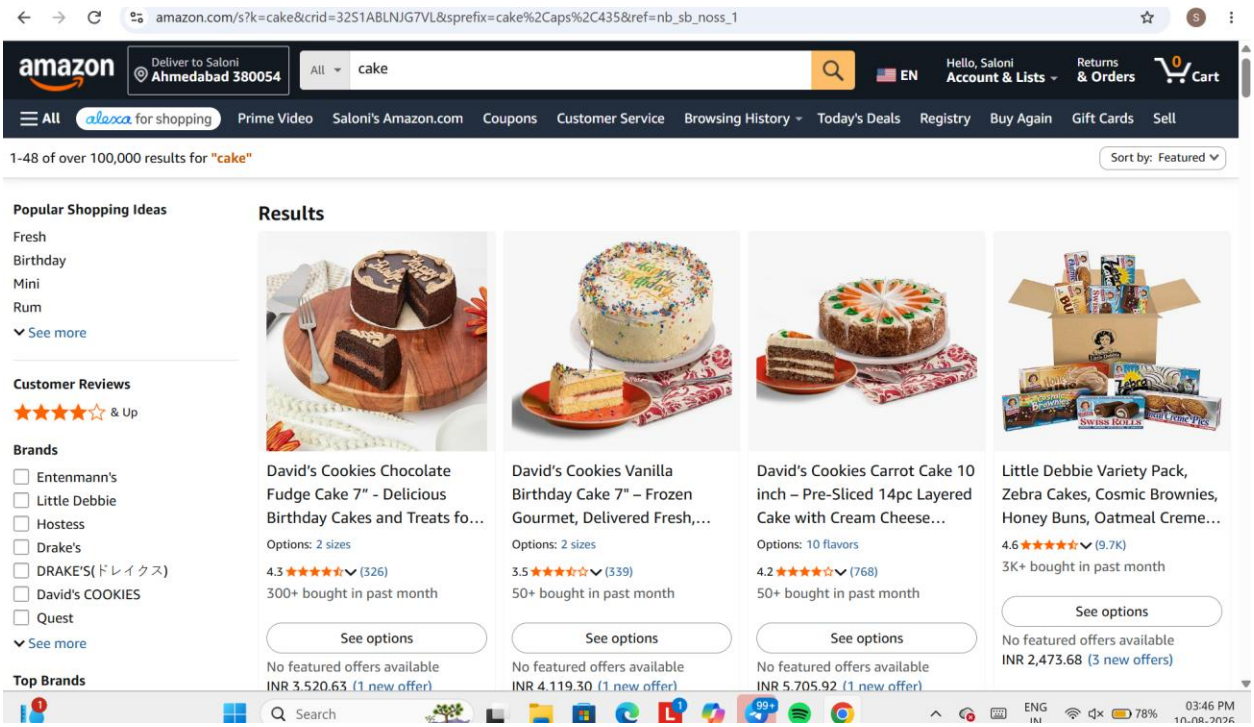

Scenario: Search for a product using a keyword

Test Steps:
1. Click on the search bar
2. Type keyword "cake"
3. Click the search icon / press Enter

Test Input: cake
Expected Result: Relevant search results for "cake" should be displayed with filters (Brands, Customer Reviews, etc.)
Actual Result: 1-48 of over 100,000 results for "cake" displayed with product images, ratings, prices and delivery location shown as Ahmedabad 380054
Status: **Pass**

Comments: *Search returned relevant results with working filter panel*

Screenshots:

Scenario ID: 2b

Scenario: Search with special characters / gibberish keyword

Test Steps:

1. Click on the search bar
2. Enter a random/invalid string (e.g. "@@@###")
3. Press Enter

Test Input: Special character string

Expected Result: System should show a "No results found" message or suggest related searches, without breaking the layout

Actual Result: Not verified in this session — no screenshot captured for this negative flow

Status: Not Executed

Comments: *Recommended to be executed in a future test cycle*

Screenshots: -

Scenario ID: 3a

Scenario: View product details page

Test Steps:

1. Click on a product from the search results
2. Observe the product details page

Test Input: 100 Pack Cookie Bags with Seal (bakery packaging product)

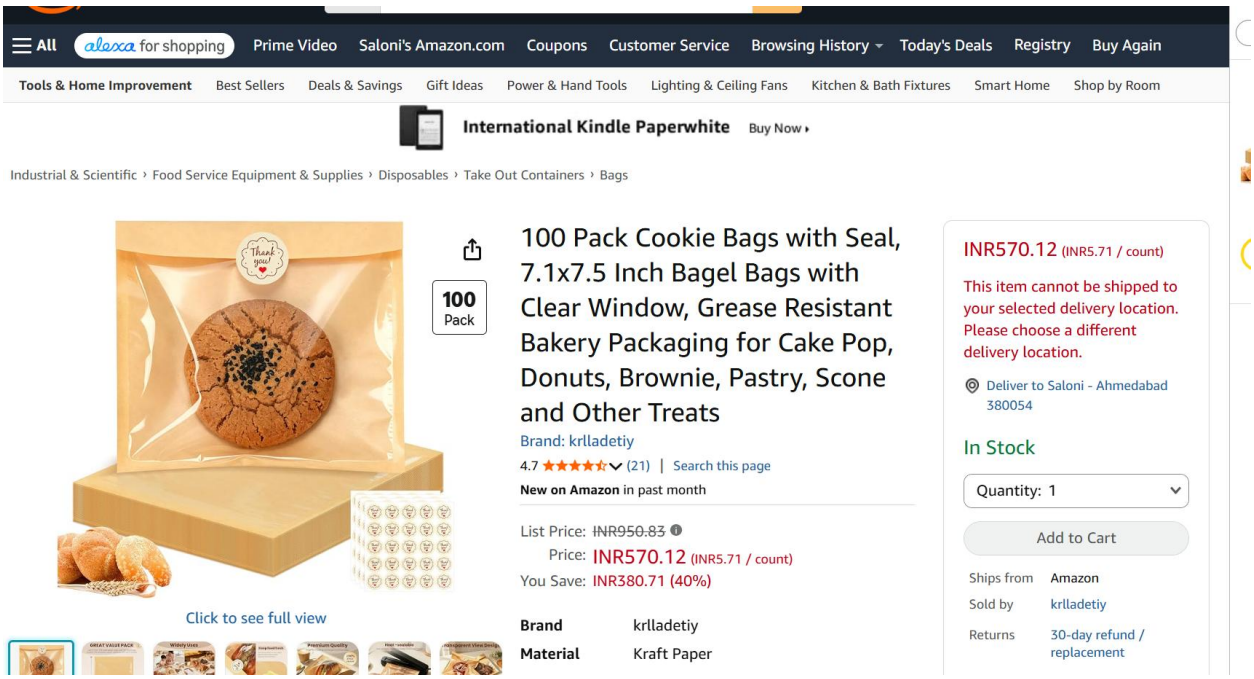

Expected Result: Product page should show title, price, brand, ratings, and delivery availability for the selected location

Actual Result: Product page displayed correctly with price INR570.12, brand, ratings (4.7, 21 reviews); however a red warning was shown: "This item cannot be shipped to your selected delivery location. Please choose a different delivery location." even though delivery address was set to Ahmedabad, India

Status: Fail

Comments: *Shipping-eligibility message appears incorrectly for a valid, serviceable Indian address — logged as a bug (see Bug Reports)*

Screenshots:

Scenario ID: 3b

Scenario: Add product to cart

Test Steps:

1. On the product page, click Add to Cart
2. Navigate to Shopping Cart

Test Input: Quantity: 1

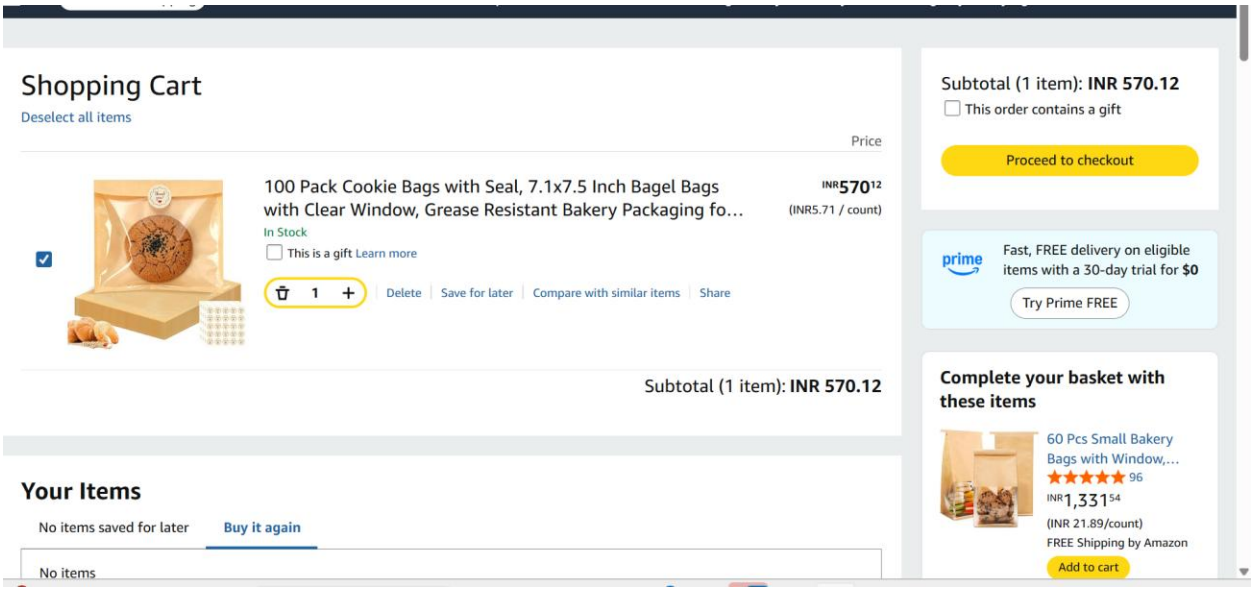

Expected Result: Item should be added to the cart with correct name, price and quantity reflected in the cart page

Actual Result: Item "100 Pack Cookie Bags with Seal..." was added successfully; cart showed Subtotal (1 item): INR 570.12, matching the product page price

Status: **Pass**

Comments: *Cart correctly reflects item, price and subtotal. Note: item was added successfully despite the shipping-restriction warning seen in 3a, which is inconsistent behaviour*

Screenshots:

Scenario ID: 4a

Scenario: Proceed to checkout — enter delivery address & customs ID

Test Steps:

1. From the cart page, click Proceed to Checkout
2. Verify the delivery address shown
3. Observe the "Add ID for customs clearance" section and order summary

Test Input: Delivery address: Saloni Tanna, Ahmedabad, Gujarat 380054, India

Expected Result: Checkout page should display the correct delivery address, request a customs ID as required for India, and show a correct payment total in the appropriate currency

Actual Result: Delivery address displayed correctly; customs ID section appeared with an option to add a new ID; however Order Total showed INR 570.12 while Payment Total showed USD 0.00, which is inconsistent

Status: **Fail**

Comments: *Payment Total displaying USD 0.00 instead of the converted charge amount is misleading and logged as a bug (see Bug Reports)*

GUJARAT, 380054, India

Add ID for customs clearance

Customs regulations for India require the following information for this shipping address: ID number. This ID will be stored securely and used solely for the purpose of clearing customs (including sharing it with carriers and customs officials) for this order, future orders, and any product returns. Learn more

Address on identification documents must match recipient's address to clear customs. If this is different, or if a document type has been provided which does not include proof of address (e.g. PAN card, non-Indian passport), the carrier will request additional documentation to verify address in order to clear customs.

Summary Of Test Results

Total Test Cases - 10

Passed - 6

Failed - 2

Not Executed - 2

Pass % - 60.00%

Conclusion and Recommendations

Pass Rate: 60.00%, Needs Improvement

Issues Found

1. Inconsistent Shipping Restriction Message (3a) The product page showed a "cannot be shipped to your selected delivery location" warning for a valid Ahmedabad address, yet the item was still added to cart and taken through checkout successfully.

2. Incorrect Payment Total at Checkout (4a) Checkout page displayed "Payment Total: USD 0.00" while the Order Total was INR 570.12, which is misleading for the customer.

Recommendations

1. Fix Shipping Eligibility Validation Ensure the shipping-restriction warning only appears for genuinely non-serviceable addresses, and blocks Add to Cart / Checkout consistently when shown.

2. Fix Currency Conversion Display Ensure Payment Total always reflects the correctly converted charge amount instead of defaulting to 0.00.

3. Execute Pending Negative Test Cases Complete and document the negative scenarios (invalid mobile number sign-in, invalid search keyword) that were not executed in this session.

Bug Reports

1.

Bug ID	BUG-3a
Title	Product page incorrectly shows "cannot be shipped to your selected delivery location" for a valid Indian address
Module	Product Details Page
Severity	
Steps to Reproduce	1. Set delivery location to Ahmedabad, India 2. Open the "100 Pack Cookie Bags with Seal" product page
Expected Result	Product should show as available for delivery to the selected valid address, or the warning should match actual shippability
Actual Result	A red warning stated the item cannot be shipped to the selected location, yet the item was successfully added to cart and carried through checkout without issue

2.

Bug ID	BUG-4a
Title	Payment Total shown as USD 0.00 at checkout while Order Total shows INR 570.12
Module	Checkout Page
Severity	

Steps to Reproduce	1. Add an item to cart 2. Proceed to checkout 3. Observe Order total and Payment Total fields
Expected Result	Payment Total should reflect the correct converted charge amount corresponding to the Order Total
Actual Result	Payment Total field displayed "USD 0.00", which does not correspond to the INR 570.12 order total and could confuse the customer about the actual amount to be charged
