SILVER OAK UNIVERSITY

TUTORIAL - 5 : Defect Reporting

Aim: Apply defect identification and prepare professional bug reports including severity, priority, screenshots, and reproduction steps.

Description: This practical focuses on identifying defects (if any) and preparing professional test cases & bug reports for the MakeMyTrip website (Flight booking flow). Functional and UI test cases were designed and executed covering search, date selection, filters, fare selection, login modal, review booking, and traveller details pages.

Module Name: MakeMyTrip Flight Booking - Functional & UI Test Cases

Test Case ID: MMT_TC_01

Webpage URL: https://www.makemytrip.com

Tester Name: Saloni Ashish Tanna

Environment: Desktop Browser (Chrome/Edge) | Stable Internet

TEST CASES

Scenario ID: 1a

Scenario: Search one-way flight with valid cities and date

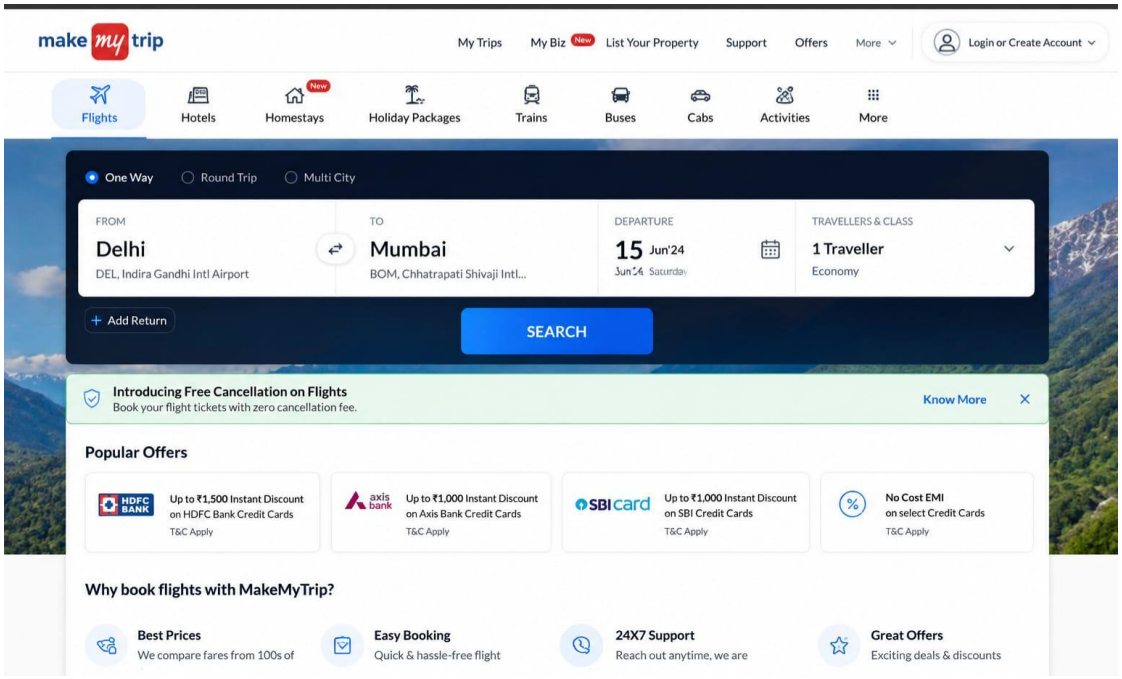

Test Steps:

1. Open MakeMyTrip website
2. Select Flights tab
3. Select One Way
4. Enter From: Delhi
5. Enter To: Mumbai
6. Select Departure Date: 15 Jun 2024
7. Select 1 Traveller, Economy
8. Click SEARCH

Expected Result: Flight search results page loads showing available flights with prices, timings and filters.

Actual Result: 191 Flights Found. List of flights displayed correctly.

Status: Pass

Screenshot 1a – Home / Search page with Delhi → Mumbai, 15 Jun'24

Scenario ID: 1b

Scenario: Open calendar and select departure date

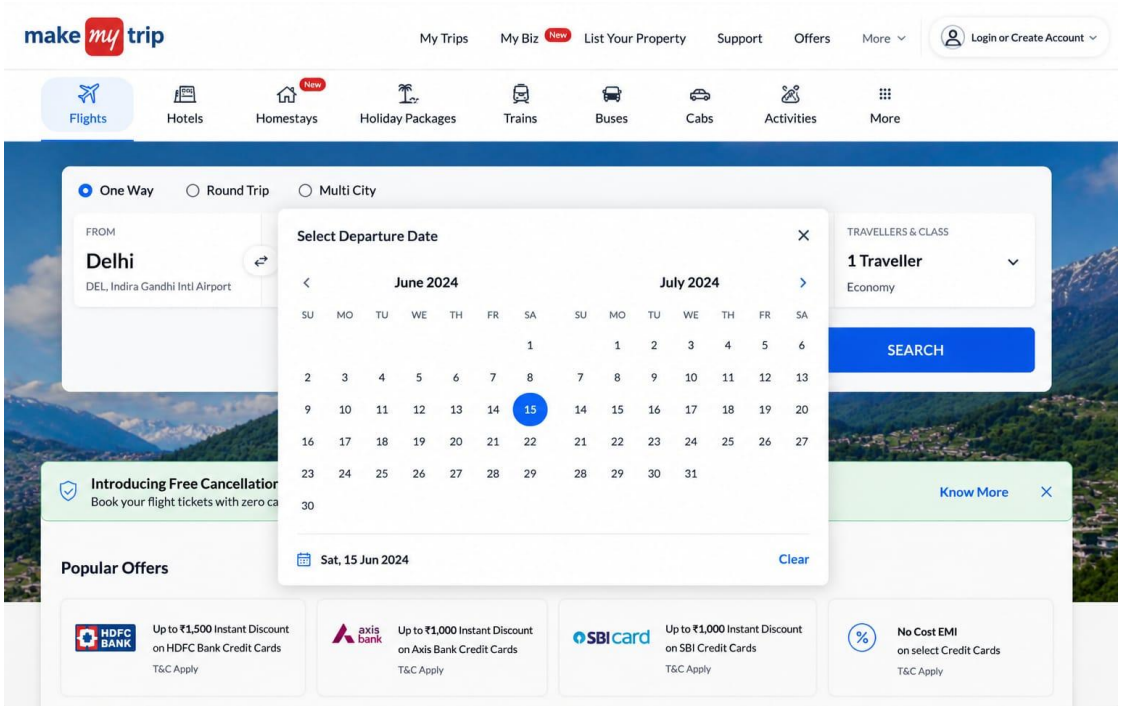

Test Steps:

1. On flight search page click Departure date field
2. Calendar popup opens
3. Select date 15 Jun 2024

Expected Result: Calendar displays correctly; selected date shown as Sat, 15 Jun 2024.

Actual Result: Calendar opened with June & July 2024. Date 15 highlighted. Footer shows selected date.

Status: Pass

Screenshot 1b – Date picker calendar (15 Jun 2024 selected)

Scenario ID: 1c

Scenario: Apply Price Low to High filter on search results

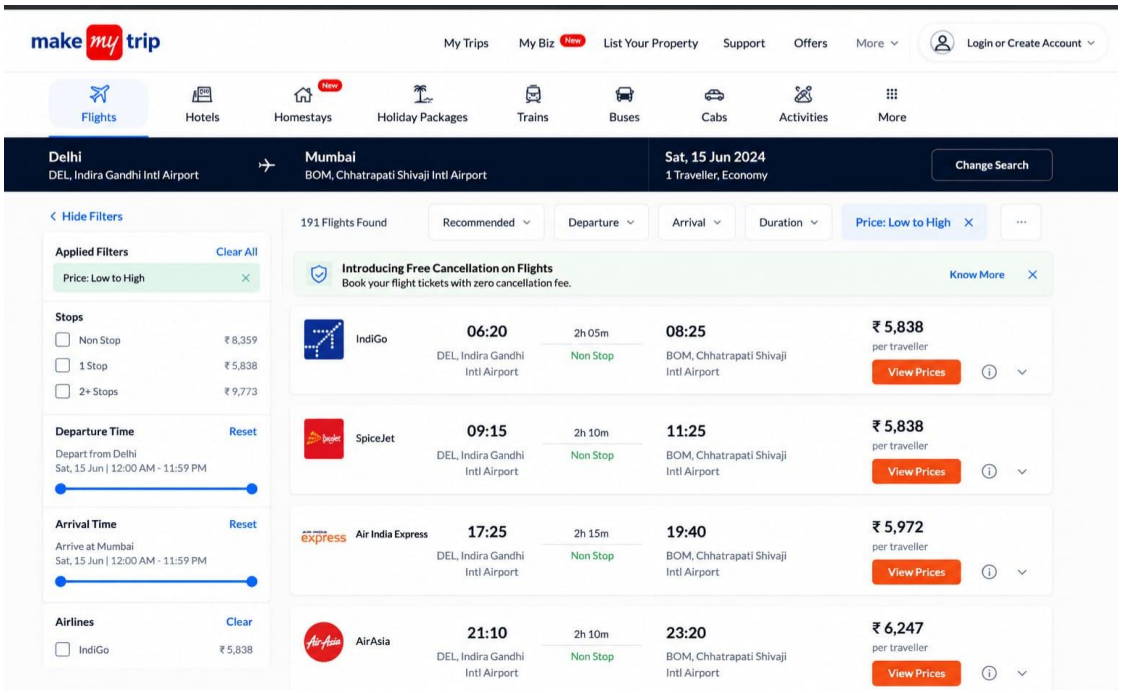

Test Steps:

1. After results load, apply ‘Price: Low to High’ sort
2. Observe order of flights and Applied Filters

Expected Result: Flights sorted by ascending price; filter chip visible under Applied Filters.

Actual Result: Sorted correctly. Lowest ₹5,838 first. Applied Filters shows ‘Price: Low to High’.

Status: Pass

Screenshot 1c – Results sorted Price: Low to High (₹5,838 first)

Scenario ID: 1d

Scenario: Select a flight and view fare options (Saver / Flexi / Super 6E)

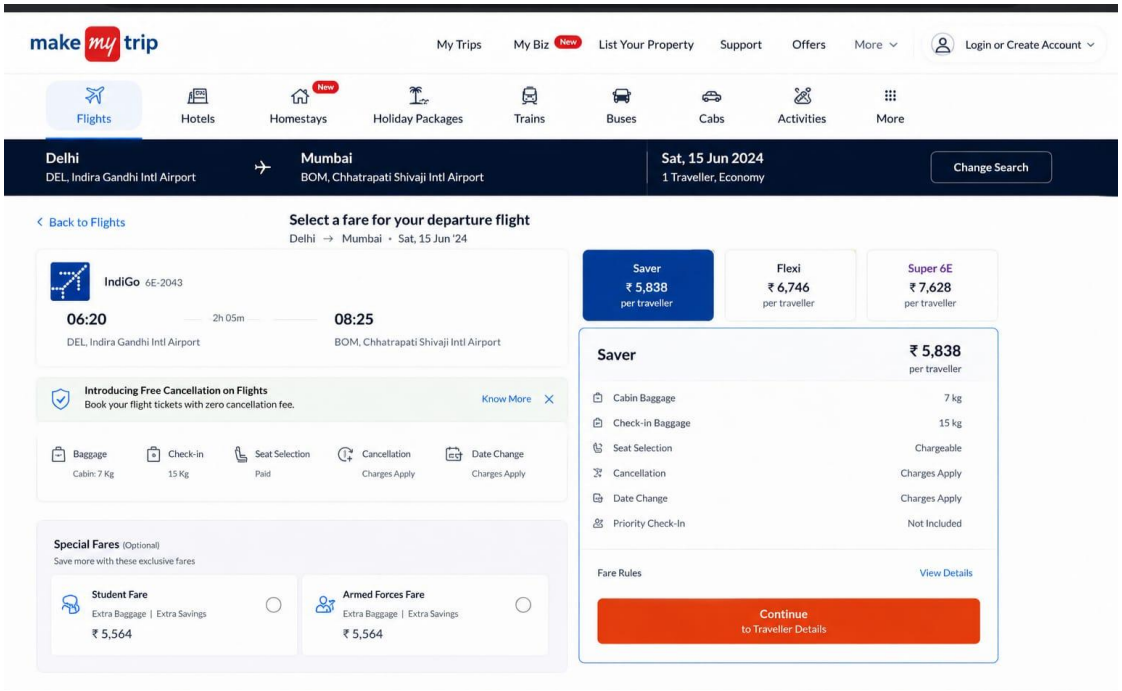

Test Steps:

1. Click View Prices on IndiGo 6E-2043 (06:20–08:25)
2. Observe Saver, Flexi, Super 6E options
3. Select Saver

Expected Result: Fare options with baggage, cancellation, seat selection details shown. Continue enabled.

Actual Result: Saver ₹5,838 selected with 7kg cabin / 15kg check-in details. Continue to Traveller Details present.

Status: Pass

Screenshot 1d – Fare selection (Saver / Flexi / Super 6E)

Scenario ID: 1e

Scenario: Review booking page and observe login prompt

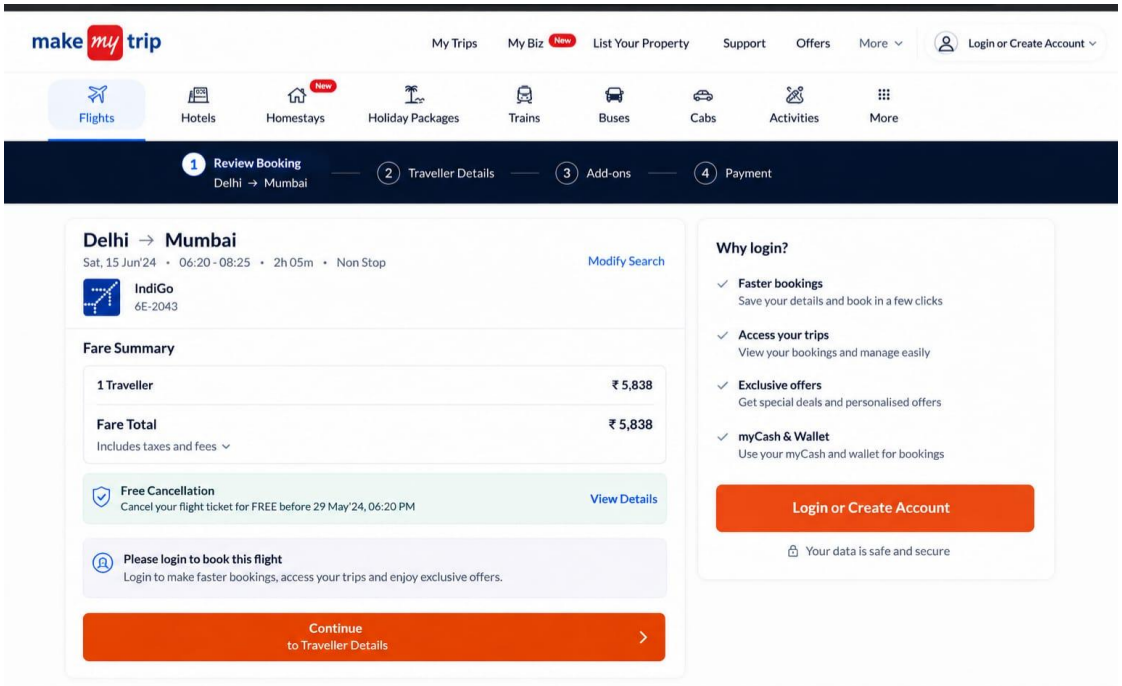

Test Steps:

1. After selecting Saver click Continue
2. Land on Review Booking
3. Observe Fare Summary and login prompts

Expected Result: Flight details, Fare Total ₹5,838, Free Cancellation info, login prompt and buttons visible.

Actual Result: Review page shows correct summary, Free Cancellation till 29 May'24, Login or Create Account button.

Status: Pass

Screenshot 1e – Review Booking page with login prompt

Scenario ID: 1f

Scenario: Open Login / Create Account modal

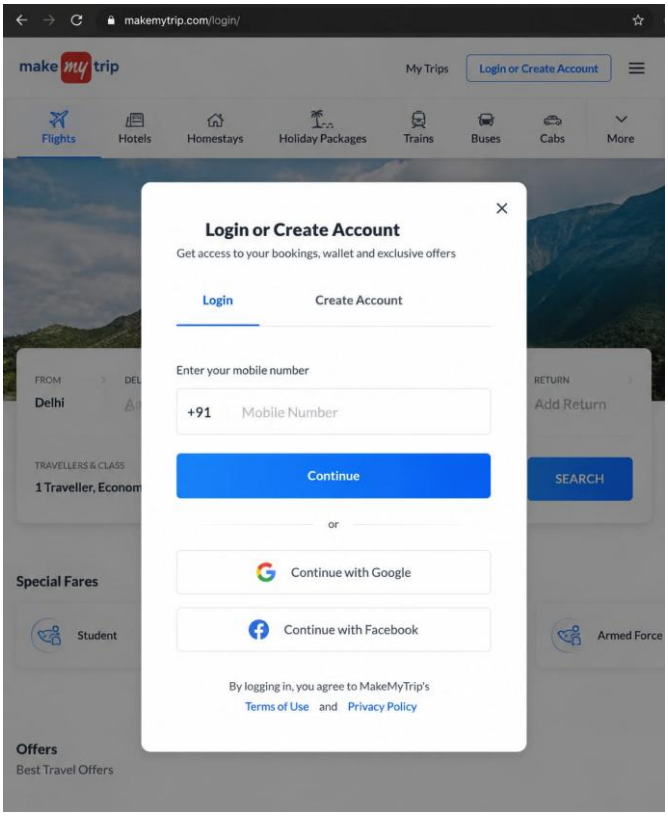

Test Steps:

1. Click Login or Create Account
2. Modal opens
3. Observe fields and social login options

Expected Result: Modal with mobile number (+91), Continue, Continue with Google / Facebook.

Actual Result: Modal opened correctly with all expected elements and Terms links.

Status: Pass

Screenshot 1f – Login or Create Account modal

Scenario ID: 1g

Scenario: Navigate to Traveller Details form

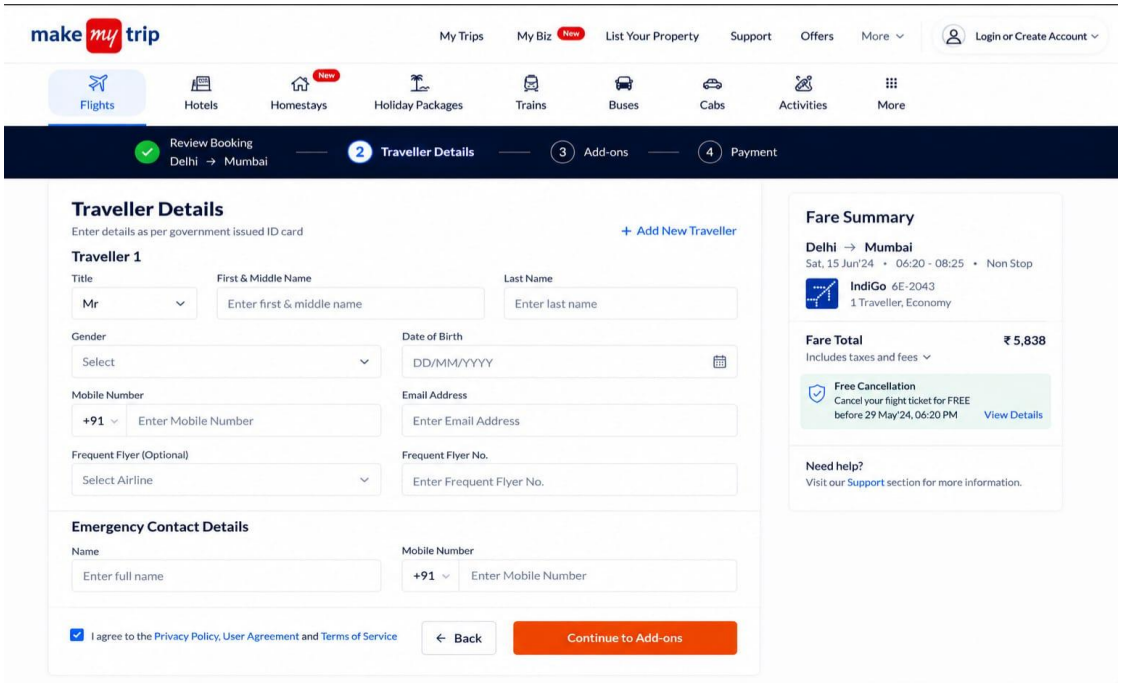

Test Steps:

1. Proceed to Traveller Details step
2. Observe form fields and progress bar

Expected Result: Form with Title, Name, Gender, DOB, Mobile, Email, Emergency Contact; progress shows step 2.

Actual Result: All fields present. Progress indicator correct. Fare Summary sidebar visible.

Status: Pass

Screenshot 1g – Traveller Details form (Step 2)

Scenario ID: 1h

Scenario: UI check – Free Cancellation banner and Popular Offers section

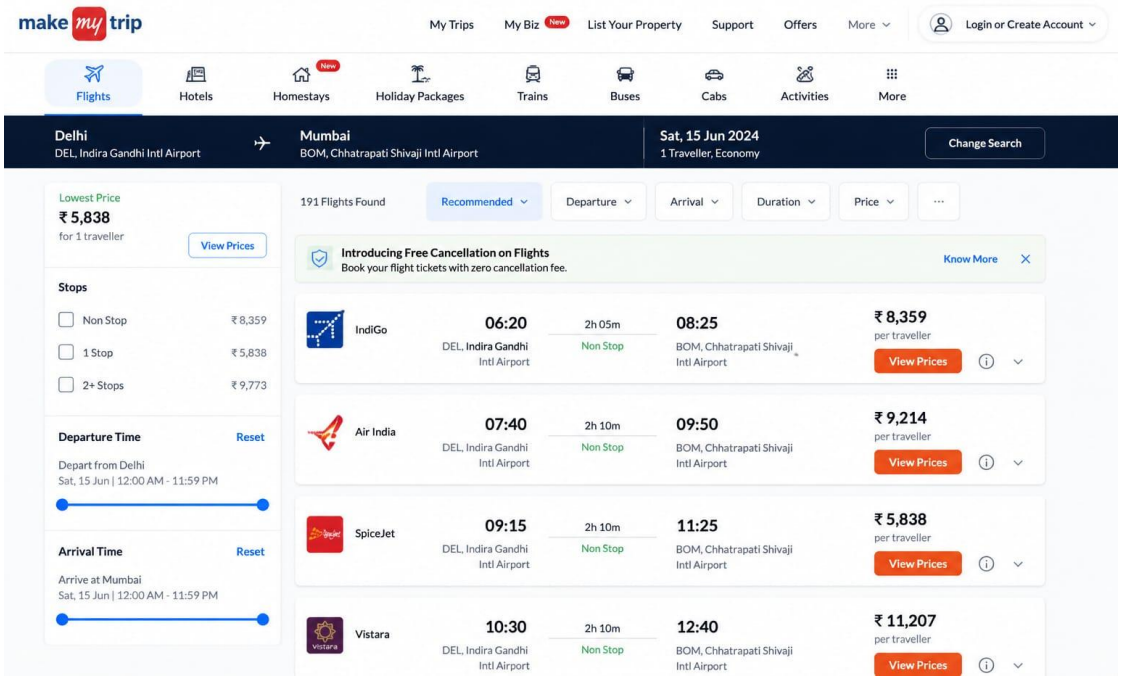

Test Steps:

1. Observe Free Cancellation banner on home/search
2. Check Popular Offers cards
3. Check ‘Why book flights with MakeMyTrip’ section

Expected Result: Banner, offer cards (HDFC/Axis/SBI/EMI) and benefit icons visible and consistent.

Actual Result: All promotional UI elements rendered correctly and dismissible where applicable.

Status: Pass

Summary Of Test Results

Metric	Value
Total Test Cases	8
Passed	8
Failed	0
Pass %	**100%**

Conclusion and Recommendations

Pass Rate: 100%. All executed test cases for the MakeMyTrip flight booking flow (search, date selection, sorting, fare selection, review, login modal, traveller details, and promotional UI) passed successfully.

No critical functional or UI defects were observed in the tested scenarios during this practical execution.

Recommendations:

1. Continue monitoring fare consistency across sort/filter combinations under heavy load.
2. Ensure login modal remains accessible and keyboard-navigable for accessibility compliance.
3. Periodically validate Free Cancellation messaging dates against actual policy changes.
4. Consider adding explicit validation messages when required traveller fields are left empty (future negative testing).

Bug Reports

No bugs were identified in the 8 test scenarios executed for this practical. All features under test behaved as expected.
